

## FM200 Commercial Fire Extinguisher Cabinet Fireproof Device For Hotels Fire Fighting

Our Product Introduction

for more products please visit us on [gas-firesuppression.com](http://gas-firesuppression.com)

### Basic Information

- Place of Origin: China
- Brand Name: xinlin
- Certification: ISO9001,CE,QMS,CCCF,CNAS
- Model Number: GQQ90/2.5-XL
- Minimum Order Quantity: 3set system
- Price: negotiation
- Packaging Details: Plywood outer box with bubble bag or paper
- Delivery Time: 10-15 working days after payment or receipt of L/C
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 30000 sets per week

### Product Specification

- Fire Extinguishing Methods: Fully Submerged Fire Extinguishing
- Starting Mode: Automatic, Electrical Manual, Mechanical Emergency
- Application: Indoor
- Capacity: 40L,70L,100L,120,150L,180L
- Company Type: Manufacturer Over 10-Years
- Feature: Clean Gas And Environmental Friendly
- Body Material: Steel Cylinder
- Package Size: 550.00cm \* 530.00cm \* 1900.00cm
- Storage Pressure: 2.5MPa
- Max Working Pressure: 4.2MPa
- Object: Class A, B, C, E Fires
- Agent: Fm200(htc-227ea Or Heptafluoropropane)
- Highlight: commercial fire extinguisher cabinet, cabinet fireproof, cabinet fire proof

## Product Description

### Product description

#### High Quality FM200 Automatic Cabinet Fire Extinguisher Device for Hotels Fire Fighting

FM200 (HFC-227EA) is a kind of clean gas extinguishing agent based on chemical fire extinguishing, colorless, tasteless, low toxicity, non-conductive and non-polluting protected objects, and is an ideal substitute for alkyl halide extinguishing agent. The fire extinguishing agent has high fire extinguishing efficiency, fast speed, automatic, manual and mechanical emergency starting and other starting modes, and the system is safe and reliable.

FM200 cabinet type fire extinguishing device is a prefabricated fire extinguishing agent storage device and spraying parts, which are designed in advance according to certain application conditions and assembled into a set of fully submerged gas fire extinguishing system with linkage control function. Cabinet SEvofluoropropane fire extinguishing device has no pipe network connection, and it is not necessary to set up a separate storage room. The cylinder and the entire system are installed in the protected area only, allowing for flexible installation. When there is a fire, the fire extinguishing agent can be sprayed directly to the protection area, and the fire extinguishing speed is fast and the efficiency is high.

The cabinet type SEvofluoropropane fire extinguishing device is composed of fire extinguishing agent storage bottle, bottle head valve, cabinet body, pressure signal device, safety valve, nozzle, detector, etc. According to the protection area, it is divided into: unit independent system and combined distribution system. According to the system structure, it is divided into: with pipe network fire extinguishing system and without pipe network fire extinguishing system.

The FM200 fire extinguishing system is divided into network fire extinguishing system and non-pipe extinguishing system, and the pipe extinguishing system is usually suitable for large or long-term protection areas, such as data centers, factories, warehouses and so on. This is because there are pipe networks that require more engineering and installation work and are suitable for large sites.

In contrast, the non-pipe network fire extinguishing system is more flexible and suitable for smaller areas, such as computer rooms, electrical rooms, telecommunications equipment rooms, small oil depots, archives, software repositories and other places. This is because no pipe network system does not need to set up a special pipe network, design, installation, use, maintenance is simple.

### Technical parameter

Model	GQQ150/2.5-XL
Executive standards	GB16670-2006
Filling density	$\leq 1120\text{kg/M}^3$
Working temperature	0°C~50°C
Storage pressure	2.5MPa(+20°C)
Max working pressure	4.2MPa(+50°C)
System spray time	Computer room $\leq 8\text{s}$ , others $\leq 10\text{s}$
Fire extinguishing design concentration	8-10%
System startup mode	Automatic,Pneumatic manual,Mechanical emergency
Fire extinguishing methods	Fully submerged fire extinguishing

### Company profile

Guangzhou Xinlin Firefighting Equipment Co., Ltd. is located in Guangzhou, a vital city connecting China to the world, characterized by its convenient transportation and picturesque environment. We are a manufacturing company with a professional and seasoned team of employees, consisting of solution design experts, technical installation specialists, quality inspection professionals, and after-sales service teams, dedicated to the research and development of HFC-227ea (FM200), IG541, IG100, and Novec 1230 products.

Currently, we offer a range of commonly used fire suppression systems, including FM200 fire suppression systems, cabinet-style FM200 fire suppression systems, fully automatic fire extinguisher (hanging), portable fire extinguisher, IG541 fire suppression systems, IG100 fire suppression systems, fire detection tube fire suppression systems, as well as automatic fire extinguishing pipelines.

With high quality products, perfect service and good reputation, the company has won wide praise from customers at home and abroad.

### Why choose us

- Efficient management system
- More than 10 years of experience in gas fire fighting industry
- Advanced equipment and professional engineers
- We provide 8x6 hr technical support and after-sales service

### Frequently Asked Questions

Q1: Are you a manufacturer or a trading company?

A1: We are the manufacturer.

Q2: Do you have OEM orders?

A2: Yes, according to the customer's requirements.

Q3: Where is your factory located? How do I get there?

A3: Our factory is located in Dongzhou Industrial Park, Xintang Town, Zengcheng District, Guangzhou City, Guangdong Province, China.

You are very welcome to visit our factory.
