

Inert Gas Fire Suppression System Containers Fm200 Cylinder Refilling

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: xinlin
- Certification: ISO9001,CE,CCCF,CNAS,QMS
- Model Number: 40L 70L 90L 100L 120L 150L
- Minimum Order Quantity: 100 sets
- Price: negotiation
- Packaging Details: Plywood case
- Delivery Time: 10-15 working days after payment or receipt of L/C
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 40000 sets per week

Product Specification

- Origin: Guangzhou, Guangdong
- Color: Red
- Model: HJ150L-2.5/01-XL
- Supply Ability: 60000
- Cylinder Material: Steel Material
- Use: Fire Fighting Equipment
- Working Temperature: 0c-50c
- Highlight: Inert Gas Fire Suppression System, Fm200 Cylinder, fm 200 cylinder refilling

Product Description

Product introduction

Inert Gas Fire Suppression System Containers Fm200 Cylinder

Welded steel cylinders are containers that store gases or liquids in steel cylinders. They are widely used in various fields, including industry, medical care, firefighting, and more. The body of the welded steel cylinder is composed of a cylindrical shell and top and bottom convex heads (elliptical or disc-shaped) that are welded together. The material must be made of killed steel smelted in open-hearth furnaces, electric furnaces, or oxygen converters. Welded steel cylinders mainly contain low-pressure liquefied gases and dissolved gases. As the gas cylinders are mobile pressure vessels, their material selection, pulverization, and price are subject to relevant standards to ensure safe use.

Welded cylinder

Welded steel cylinders have the following characteristics:

High-pressure storage: Welded steel cylinders can withstand high pressures, which increases the density of the gas and allows for the storage of more gas.

Good sealing: The bottle mouth and valve of the welded cylinder are strictly sealed to ensure the purity and safety of the gas.

Corrosion resistance: Welded steel cylinders are usually made of stainless steel or alloy materials, which have good corrosion resistance and can withstand the corrosion of various chemical gases.

Long service life: The service life of welded steel cylinders is generally longer, depending on the usage environment and maintenance conditions.

Easy to carry: The volume and weight of welded steel cylinders are relatively small, making them easy to carry and move.

Company profile

Guangzhou Xinlin Firefighting Equipment Co., Ltd. is located in Guangzhou, a vital city connecting China to the world, characterized by its convenient transportation and picturesque environment. We are a manufacturing company with a professional and seasoned team of employees, consisting of solution design experts, technical installation specialists, quality inspection professionals, and after-sales service teams, dedicated to the research and development of HFC-227ea (FM200), IG541, IG100, and Novec 1230 products. Currently, we offer a range of commonly used fire suppression systems, including FM200 fire suppression systems, cabinet-style FM200 fire suppression systems, fully automatic fire extinguisher (hanging), portable fire extinguisher, IG541 fire suppression systems, IG100 fire suppression systems, fire detection tube fire suppression systems, as well as automatic fire extinguishing pipelines. With high quality products, perfect service and good reputation, the company has won wide praise from customers at home and abroad.
