### **Product description**

Factory Directly Sale Type FM200 Full Automatic hfc-227ea Fire suppression

FM200 internal pressure storage fire extinguishing device: an efficient and safe new choice for fire protection In the pursuit of efficient and safe fire protection solutions, the FM200 internal pressure storage fire extinguishing device stands out with its unique advantages. This fire extinguishing device not only has excellent fire extinguishing performance, but is also environmentally friendly during use, making it the first choice fire protection equipment in many important places. FM200 (hfc-227ea) is an efficient fire extinguishing agent. Its fire extinguishing mechanism is to quickly reduce the oxygen concentration around the fire source, thereby achieving the effect of rapid fire extinguishing. The internal pressure storage design ensures the stability of the fire extinguishing agent during storage and transportation, and also enables the fire extinguishing agent to be released quickly and accurately when a fire occurs.

In addition, the FM200 internal pressure storage fire extinguishing device also has a high degree of automation and intelligence. It can be linked with fire alarm systems, automatic sprinkler systems and other equipment to achieve timely detection and rapid response to fires. Once a fire occurs, the device will automatically start and spray an appropriate amount of heptafluoropropane fire extinguishing agent to quickly control the fire to the minimum range.

In practical applications, FM200 internal pressure storage fire extinguishing device has been widely used in key places such as computer rooms, libraries, and museums. These places usually store a large amount of important equipment and precious cultural relics. Once a fire breaks out, the consequences will be disastrous. Therefore, choosing heptafluoropropane internal pressure storage fire extinguishing device as a fire prevention measure can not only effectively protect the safety of these places, but also provide strong support for personnel evacuation and rescue work.

### **Technical parameter**

Model	QMP150/4.2W-XL-88
Executive standards	Q/GZXL001-2021
Storage pressure	4.2Mpa(+20°C)
Working temperature range	0~50°C
Filling density	≤1250kg/M <sup>3</sup>
Storage pressure	0.3Mpa(+20°C)
Maximum working pressure	5.3Mpa(+50°C)
System spray time	Computer room≤8S,Others≤10S
Fire extinguishing methods	Total flooding
Fire extinguishing design concentration	8-10%
Starting Method	Automatic, pneumatic, manual mechanical emergency start
Fire extinguishing method	Fully submerged fire extinguishing

#### **Company profile**

Guangzhou Xinlin Firefighting Equipment Co., Ltd. is located in Guangzhou, a vital city connecting China to the world, characterized by its convenient transportation and picturesque environment. We are a manufacturing company with a professional and seasoned team of employees, consisting of solution design experts, technical installation specialists, quality inspection professionals, and after-sales service teams, dedicated to the research and development of HFC-227ea (FM200), IG541, IG100, and Novec 1230 products.

Currently, we offer a range of commonly used fire suppression systems, including FM200 fire suppression systems, cabinetstyle FM200 fire suppression systems, fully automatic FM200 extinguishers (ceiling-mounted), IG541 fire suppression systems, IG100 fire suppression systems, fire detection tube fire suppression systems, as well as automatic fire extinguishing pipelines.

With high quality products, perfect service and good reputation, the company has won wide praise from customers at home and abroad.

#### **Frequently Asked Questions**

-----

Q1: Are you a manufacturer or a trading company?

A1: We are a professional manufacturer specializing in gas fire suppression systems.

Q2: Do you offer OEM products?

A2: Yes, we welcome your own designs and drawings.

Q3: Where is your factory located?

A3: Our factory is situated in the East Lake Industrial Park of XinTang Town, Zengcheng District, Guangzhou City, Guangdong Province, China.

Q4: How can I get to your factory?

A4: Due to convenient transportation, you can reach us by taxi or by subway. If taking the subway, please take Line 13 to Shacun Station. Before disembarking, kindly inform us in advance, and we will arrange for a comfortable business van to pick you up from there.
