Product Description

Product description

150L FM200 cylinder HFC-227ea fire extinguisher cylinder

Efficient storage, safety first choice

The fM200 cylinder is a professional container designed for high-pressure gas storage. It is widely used in many fields due to its high efficiency and safety. This cylinder is made of high-strength steel and processed with precision technology to ensure it remains stable and reliable in high-pressure environments.

The design of the fM200 cylinder fully considers the storage needs of gas, and its internal space has been optimized to accommodate gas to the greatest extent and improve storage efficiency. At the same time, the cylinder's sealing performance is excellent, effectively preventing gas leakage and ensuring safety during storage.

In terms of safety performance, the fM200 cylinder performs well. It has multiple safety protection measures, including explosion-proof design, pressure monitoring, etc., and can respond promptly in abnormal situations to ensure the safety of personnel and equipment. In addition, the cylinders undergo strict quality testing to ensure that they maintain good performance during use.

fM200 cylinders are widely used in chemical industry, medical treatment, scientific research and other fields, providing efficient and safe gas storage solutions for these industries. Whether used as a gas storage container in the laboratory or as a gas supply equipment in industrial production, the fM200 cylinder can perform excellently, bringing convenience and peace of mind to users.
