

Fm 200 Agent Empty Fire Fighting Fire Extinguisher Cylinders 40kg To 150kg

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Guangzhou Xinlin Firefighting Equipment Co., Ltd.
- Certification: ISO9001,CE,CCCF,CNAS,QMS
- Model Number: 40L 70L 90L 100L 120L 150L
- Minimum Order Quantity: 200 sets
- Price: negotiation
- Packaging Details: Plywood outer box with bubble bag or paper
- Delivery Time: 10-15 working days after payment or receipt of L/C
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 50000 sets per week

Product Specification

- Color: Red
- Model: HJ150L-2.5/01-XL-21
- Cylinder Material: Steel Material
- Use: Fire Fighting Equipment
- Working Temperature: 0c-50c
- Highlight: fm 200 agent 150kg,
fire extinguisher cylinders 150kg,
fire extinguisher cylinders 40kg

Product Description

product description

Fire Extinguishers Cylinder Empty fire fighting fire extinguisher cylinders 40kg to 150kg

FM200 gas fire extinguishing cylinder carries the globally recognized high-efficiency and environmentally friendly fire extinguishing agent HFC-227ea (heptafluoropropane). It is deeply trusted by users in various industries for its excellent fire extinguishing performance and environmentally friendly characteristics. The cylinder is manufactured in strict accordance with international fire protection standards. The FM200 fire extinguishing agent contained is a colorless, odorless, non-toxic and non-conductive clean gas. It is designed to quickly and safely extinguish all types of fires, especially for electronic equipment and precision instruments. Provides non-destructive fire extinguishing protection in vulnerable environments such as items and valuables.

Fire extinguishing agent properties

FM200 fire extinguishing agent has excellent fire extinguishing effect on Class A, B and C fires through the dual effects of physical cooling and chemical suppression. Its global warming potential (GWP) is much lower than that of early halon fire extinguishing agents. It is in line with international environmental protection trends and ensures that it can effectively extinguish fires while mitigating the impact on the earth's climate environment.

Features

High-quality material: FM200 gas cylinder is made of high-quality alloy steel and has undergone strict pressure testing and anti-corrosion treatment to ensure the safety of long-term storage and use.

Precise control: The built-in precision valve system ensures that when a fire occurs, the amount of fire extinguishing agent released can be accurately controlled and the fire can be suppressed quickly and efficiently.

Wide application: Provides a variety of capacity specifications to meet the needs of protection areas of different sizes. It is widely used in data centers, communication equipment rooms, libraries, museums, laboratories, financial institutions and other places.

Detailed explanation of usage scenarios

Data centers and telecommunications equipment rooms: FM200 gas fire extinguishing system can quickly extinguish electrical fires without damaging electronic equipment, effectively ensuring data security and business continuity.

Libraries and archives: Provide water-free, non-residue, non-corrosive fire protection for paper materials and precious cultural relics, greatly reducing the cost of repairing after a fire.

Precision laboratories and high-end manufacturing: For precision instruments and high-value equipment, FM200 fire extinguishing agent can quickly extinguish the fire source without damaging the function of the equipment.

Financial institutions and treasure warehouses: Provide safe and non-polluting fire extinguishing solutions for enclosed spaces where important items are stored to ensure that property is not damaged.

All in all, FM200 gas fire extinguishing cylinder provides excellent fire protection solutions for all walks of life with its high efficiency, environmental protection and non-destructive characteristics. Whether it is a new project or the renovation and upgrade of existing facilities, the FM200 gas fire extinguishing system is your ideal choice. You are welcome to inquire for more detailed information, and we will provide customized fire protection design solutions according to your specific needs to help you build a strong fire safety barrier.

Company profile

Guangzhou Xinlin Firefighting Equipment Co., Ltd. is located in Guangzhou, a vital city connecting China to the world, characterized by its convenient transportation and picturesque environment. We are a manufacturing company with a professional and seasoned team of employees, consisting of solution design experts, technical installation specialists, quality inspection professionals, and after-sales service teams, dedicated to the research and development of HFC-227ea (FM200), IG541, IG100, and Novec 1230 products.

Currently, we offer a range of commonly used fire suppression systems, including FM200 fire suppression systems, cabinet-style FM200 fire suppression systems, fully automatic FM200 extinguishers (ceiling-mounted), IG541 fire suppression systems, IG100 fire suppression systems, fire detection tube fire suppression systems, as well as automatic fire extinguishing pipelines.

With high quality products, perfect service and good reputation, the company has won wide praise from customers at home and abroad.

Frequently Asked Questions

Q1: Are you a manufacturer or a trading company?

A1: We are a professional manufacturer specializing in gas fire suppression systems.

Q2: Do you offer OEM products?

A2: Yes, we welcome your own designs and drawings.

Q3: Where is your factory located?

A3: Our factory is situated in the East Lake Industrial Park of XinTang Town, Zengcheng District, Guangzhou City, Guangdong Province, China.

Q4: How can I get to your factory?

A4: Due to convenient transportation, you can reach us by taxi or by subway. If taking the subway, please take Line 13 to Shacun Station. Before disembarking, kindly inform us in advance, and we will arrange for a comfortable business van to pick you up from there.
