

# FM-200 Fire Extinguisher Cylinder For Quick Fire Suppression

# **Basic Information**

- Place of Origin:
- Brand Name:
- Certification:
- Model Number:
- Minimum Order Quantity: 300 sets
- Price:
- Packaging Details:
- Delivery Time:
- Payment Terms:
  - ·
- Supply Ability:

# **Product Specification**

<ul> <li>Highlight:</li> </ul>	Quick Fire Suppression Fire Extinguisher Cylinder , FM-200 Fire Extinguisher Cylinder
<ul> <li>High Light:</li> </ul>	Fm200 Cylinder
• Use:	Fire Fighting Equipment
Cylinder Material:	Steel Material
Model:	HJ90L-2.5/01-XL-29
Color:	Red

**Our Product Introduction** 

## FM-200 Fire Extinguisher Cylinder for Quick Fire Suppression

### **Product description**

FM200 welding gas cylinder involves a key component of the FM200 fire extinguishing system, which is the gas cylinder that stores FM200 fire extinguishing agent. FM200 is a clean and efficient fire extinguishing agent that is widely used in data centers, libraries, museums and other places that have strict requirements on fire extinguishing agent residues.

In the FM200 fire extinguishing system, the welding gas cylinder plays the role of storing and supplying fire extinguishing agents. These cylinders are typically made of high-strength materials to ensure safe storage of FM200 fire extinguishing agent under high pressure. At the same time, the welding process of the gas cylinder is also very important, and the welding quality must be ensured to prevent leakage or other safety issues.

When a fire occurs, the FM200 fire extinguishing system can quickly release the fire extinguishing agent in the cylinder through the activating device to effectively extinguish the fire. Because FM200 fire extinguishing agent has the characteristics of low toxicity, low corrosivity and good electrical insulation, it will not cause damage to equipment and items during the fire extinguishing process.

It should be noted that when using FM200 welding gas cylinder, relevant safety operating procedures must be followed. Operators should receive professional training and understand the working principles and operating procedures of the system. At the same time, personal protective equipment should be worn during operation to ensure safe operation. In addition, regular inspection and maintenance of gas cylinders is essential to ensure that they are in good working order.

In short, the FM200 welding gas cylinder is an important part of the FM200 fire extinguishing system. Its quality and safety directly affect the fire extinguishing effect and safety of the system. Therefore, when selecting and using FM200 welding gas cylinders, factors such as its performance, quality and safety should be fully considered.

### **Company profile**

Guangzhou Xinlin Firefighting Equipment Co., Ltd. is located in Guangzhou, a vital city connecting China to the world, characterized by its convenient transportation and picturesque environment. We are a manufacturing company with a professional and seasoned team of employees, consisting of solution design experts, technical installation specialists, quality inspection professionals, and after-sales service teams, dedicated to the research and development of HFC-227ea (FM200), IG541, IG100, and Novec 1230 products.

Currently, we offer a range of commonly used fire suppression systems, including FM200 fire suppression systems, cabinetstyle FM200 fire suppression systems, fully automatic FM200 extinguishers (ceiling-mounted), IG541 fire suppression systems, IG100 fire suppression systems, fire detection tube fire suppression systems, as well as automatic fire extinguishing pipelines.

With high quality products, perfect service and good reputation, the company has won wide praise from customers at home and abroad.

### **Frequently Asked Questions**

Q1: Are you a manufacturer or a trading company?

A1: We are a professional manufacturer specializing in gas fire suppression systems.

Q2: Do you offer OEM products?

A2: Yes, we welcome your own designs and drawings.

Q3: Where is your factory located?

A3: Our factory is situated in the East Lake Industrial Park of XinTang Town, Zengcheng District, Guangzhou City, Guangdong Province, China.

Q4: How can I get to your factory?

A4: Due to convenient transportation, you can reach us by taxi or by subway. If taking the subway, please take Line 13 to Shacun Station. Before disembarking, kindly inform us in advance, and we will arrange for a comfortable business van to pick you up from there.
