

Fm200 Gas Fire Extinguishing Fighting System Network Manifold Type For Fire Project 1.6/2.5/4.2MPA

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Guangzhou Xinlin Firefighting Equipment Co., Ltd.
- Certification: ISO9001,CE,CCCF,CNAS,QMS
- Model Number: 40L 70L 90L 100L 120L 150L
- Minimum Order Quantity: 10sets
- Price: negotiation
- Packaging Details: Plywood outer box with bubble bag or paper
- Delivery Time: 10-15 working days after payment or receipt of L/C
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 50000 sets per week

Product Specification

- Color: Red
- Model: HJ100L-2.5/01-XL-31
- Cylinder Material: Steel Material
- Use: Fire Fighting Equipment
- High Light: 4.2 / 5.6MPa Cylinder
- Highlight: **Fm200 Gas Fire Extinguishing Fighting System, Network Fire Extinguishing Fighting System**

Strong, responsible, and responsible

Product core

4.2 / 5.6MPa Total Flood FM200 Fire Extinguishing System Cylinder

FM200 (HFC-227ea), an advanced fire-extinguishing medium, has excellent cleanliness and low impact on the environment. With its excellent fire-extinguishing performance and low damage to protected items, it is widely used in various high-value and inseparable fire-extinguishing media. Protective place for alternative property.

Product Features

FM200 gas fire extinguishing cylinder is carefully made of high-strength steel. The refillable heptafluoropropane fire extinguishing agent inside is a colorless, odorless, non-corrosive and non-conductive gas at room temperature. When a fire occurs, it can quickly vaporize in a short time. And evenly distributed in the protective area, through the dual mechanism of absorbing heat, cooling and interrupting the combustion chain reaction, it can achieve rapid and effective fire extinguishing effects.

Advantages at a glance

Efficient fire extinguishing: FM200 fire extinguishing system can extinguish Class A, B, and C fires in a very short time, and is especially good at handling fires involving precision electronic equipment, valuable instruments, and important documents.

Environmentally friendly and green: Heptafluoropropane has a relatively low greenhouse effect potential, which is in line with global

environmental protection trends. It has no obvious toxicity to the human body and has no destructive effect on the atmospheric ozone layer.
Precise intelligence: With advanced detection alarm and control systems, the FM200 gas fire extinguishing system has the functions of accurate fire source detection, rapid response and automated operation to minimize losses.

Application occasions

Data centers and IT rooms: For electrical fire risks, the FM200 fire extinguishing system can quickly and effectively extinguish fires, protect equipment from damage, and ensure business continuity.

Museums and libraries: Provide water-free and residue-free fire extinguishing protection for historical relics and precious books to maintain the safety of national cultural heritage.

Scientific research laboratory: In an environment where a variety of flammable chemicals and precision experimental instruments exist, FM200 can accurately extinguish fires without damaging experimental equipment.

Financial institutions and data centers: Provide timely and efficient fire prevention and control solutions for important facilities such as bank vaults and server clusters.

Medical Equipment Rooms and Operating Rooms: In medical locations where any moisture or contamination is not allowed, the FM200 gas fire extinguishing system is an ideal choice for fire extinguishing.

In summary, FM200 gas fire extinguishing cylinder has become a key component of the modern fire safety system due to its high performance, environmental protection and adaptability. The FM200 gas fire extinguishing system we provide not only strictly follows relevant domestic and foreign standards, but also undergoes multiple quality inspections and authoritative certifications to ensure the safety and reliability of every link. No matter what kind of special environment you are in, choosing FM200 gas fire extinguishing system is your ideal choice to protect the safety of your property. If you need further information about product details or seek professional customized services, please feel free to contact us at Guangzhou Xinlin Firefighting Equipment Co., Ltd.

Company profile

Guangzhou Xinlin Firefighting Equipment Co., Ltd. is located in Guangzhou, a vital city connecting China to the world, characterized by its convenient transportation and picturesque environment. We are a manufacturing company with a professional and seasoned team of employees, consisting of solution design experts, technical installation specialists, quality inspection professionals, and after-sales service teams, dedicated to the research and development of HFC-227ea (FM200), IG541, IG100, and Novec 1230 products.

Currently, we offer a range of commonly used fire suppression systems, including FM200 fire suppression systems, cabinet-style FM200 fire suppression systems, fully automatic FM200 extinguishers (ceiling-mounted), IG541 fire suppression systems, IG100 fire suppression systems, fire detection tube fire suppression systems, as well as automatic fire extinguishing pipelines.

With high quality products, perfect service and good reputation, the company has won wide praise from customers at home and abroad.

Packing and Shipping:

FM200 cylinders should be packaged and shipped in the following manner:

- * The cylinder should be placed in a box with protective padding.
- * The box should be clearly labeled with the product name and a warning that it contains a hazardous material.
- * The box should be securely sealed with tape or glue.
- * The box should be placed in a larger shipping box.
- * Both boxes should be clearly labeled with the product name and a warning that it contains a hazardous material.
- * The larger shipping box should be securely sealed with tape or glue.
- * The package should be marked with appropriate shipping and hazard labels.
- * The shipping package should be handled with care.

Customization:

Guangzhou Xinlin Fire fighting Equipment Co.,Ltd. offers a wide range of FM200 Cylinder with various models such as 40L/70L/90L/100L/120L/150L/180L for customers to choose from. The product is made from high-quality materials and is easy to install and use. It is designed to store gaseous fire extinguishing agents such as FM200, Hfc-227ea, Novec 1230, etc. and can work in temperatures ranging from 0°C to +50°C. The product is not only highly durable but also provides high-quality gaseous fire cylinder solutions for customers.

Frequently Asked Questions

Q1: Are you a manufacturer or a trading company?

A1: We are a professional manufacturer specializing in gas fire suppression systems.

Q2: Do you offer OEM products?

A2: Yes, we welcome your own designs and drawings.

Q3: Where is your factory located?

A3: Our factory is situated in the East Lake Industrial Park of XinTang Town, Zengcheng District, Guangzhou City, Guangdong Province, China.

Q4: How can I get to your factory?

A4: Due to convenient transportation, you can reach us by taxi or by subway. If taking the subway, please take Line 13 to Shacun Station. Before disembarking, kindly inform us in advance, and we will arrange for a comfortable business van to pick you up from there.
