

## Empty Fire Suppression Equipment Cylinder System Hanging Tank Fm200 Gas Cylinder Professional Manufacturers Direct Sales

### Our Product Introduction

For more products please visit us on [gas-firesuppression.com](http://gas-firesuppression.com)

#### Basic Information

- Place of Origin: Guangzhou
- Brand Name: XinLin
- Certification: MSDS ISO CCC CE UL
- Model Number: 40/70/90/100/120/150/180
- Minimum Order Quantity: 10sets
- Price: 120
- Packaging Details: wooden package
- Delivery Time: 5 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10000/week

#### Product Specification

- High Light: Automatic Hanging Heptafluoropropane
- Fire Rating: FM200 IG541 IG100
- Portable Extinguisher: FM200 Gas Fire Extinguisher
- Medicament: FM200/Novec1230 Cylinder
- Specification: 1.62.5/4.2Mpa
- Nozzle Type: Spray
- Discharge Time: 8-10 Seconds
- Color: Red
- Material: Steel
- Highlight: **Professional Fire Suppression Equipment Cylinder System**  
**Empty Fire Suppression Equipment Cylinder System**

#### Product Description

Guangzhou Xinlin Fire Equipment Co., Ltd. is a manufacturing enterprise specializing in gas fire extinguishing systems and fire equipment. The company is located in Xintang Town, known as the hub of the eastern part of Guangzhou. Established in 2017, with a registered capital of 5 million yuan, it is a high-tech company that integrates research and development, design, production, engineering construction, and after-sales maintenance. The company is composed of a marketing and a senior technical team that with over 10 years of experience in the fire industry. Our company's main products include: cabinet FM200 fire extinguishing devices, pipeline network FM200 fire extinguishing systems, IG541 gas fire extinguishing systems, IG100 nitrogen fire

### Our Product

extinguishing systems, perfluorohexane fire extinguishing devices, etc. And our company provides customized gas fire protection overall solutions and scheme design and pipeline network renovation.

### Product Details

**High Light: automatic co2 fire extinguisher , fm200 extinguisher , 10L Capacity Fm200 Gas Cylinder**

Capacity:	10L	Outside Diameter:	32 Mm
Height:	34 Mm	Net Weight:	7 Kg
Gross Weight:	17kg	Printed Color:	Red

### Product Description

#### Description:

Fm200 cylinders can be made into two types according to pressure standard. Here we have seamless and welded steel cylinders. If you need high pressure when you save gas inside, It should be seamless steel cylinders. On the contrary, you can choose welded steel cylinder. It will save cost for you on condition that the cylinder will function.

Here this type of container is accustomed to relatively small protection zone. Or there is no too much space for placement of extinguishing device inside of protective area. This type of tank is easy to be installed on the ceiling or on the wall.

### Technical Parameters:

Technical Parameter	Description
Trademark	Xingjin / OEM
Temperature	0°C To +50°C
Usage	Store The Extinguishing Agent
Capacity	40-180L
Safety	High
Material	Steel
Production Capacity	3000 Sets Per Week
Storage Medium	FM200, Hfc-227ea, Novec 1230 Etc.
Place of Origin	Guangzhou, Guangdong, China
Installation	Easy To Install

A hanging tank FM200 gas cylinder is a type of high-pressure vessel designed for storing and releasing FM200 gas, a clean and effective fire suppression agent. The tank is typically hung from the ceiling to maximize space utilization and ensure that the gas can be distributed effectively throughout the protected area.

The hanging tank FM200 gas cylinder is made of high-strength steel and is designed to withstand the high pressure required to store and release the FM200 gas. It is equipped with a pressure relief valve that automatically releases the gas in the event of an overpressure situation to prevent the cylinder from rupturing.

The hanging tank FM200 gas cylinder is commonly used in fire suppression systems installed in areas where water-based fire suppression systems would cause damage or are not practical. This includes server rooms, control rooms, data centers, museums, archives, and other similar areas.

The FM200 gas in the hanging tank is typically released through a network of pipes and nozzles that are strategically placed in the protected area. The gas works by interrupting the fire's chemical reaction and reduces the oxygen levels in the environment, thereby extinguishing the fire quickly and effectively.

It is important to have trained professionals install and maintain the hanging tank FM200 gas cylinder fire suppression system to ensure its proper function in the case of a fire.

## Choice of extinguishing device

### Applications:

One of the most significant attributes of this fire extinguisher is its use of FM200 clean gas. This clean gas is non-toxic, non-corrosive, and leaves no residue after use, making it ideal for use in areas where sensitive equipment or materials are present. Its clean gas feature also makes it environmentally friendly and safe for use in occupied spaces.

The FM200 Hanging Fire Extinguisher is suitable for use in a variety of settings, including commercial buildings, data centers, server rooms, and more. It is also compatible with FM 200 fire alarm systems, making it an excellent addition to any fire safety plan.

The automatic hanging feature of this fire extinguisher makes it easy to install and use. It can be hung from the ceiling or mounted on a wall, ensuring that it is easily accessible in case of an emergency. This feature also makes it an ideal choice for areas where floor space is limited.

In addition to its use in emergency situations, the FM200 Hanging Fire Extinguisher is also compatible with fire extinguisher refill machines, making it easy to maintain and recharge. This feature ensures that the fire extinguisher is always in good working condition and ready for use in case of an emergency.

In conclusion, XinLin's FM200 Hanging Fire Extinguisher is an excellent choice for those looking for a reliable, durable, and environmentally friendly fire extinguisher. Its use of FM200 clean gas, compatibility with FM 200 fire alarm systems, and automatic hanging feature make it an ideal choice for various applications and scenarios.

### Customization:

Whether you need a FM 200 fire alarm system for your office building or a package size of 315.00cm \* 315.00cm \* 360.00cm for your industrial facility, XinLin offers product customization services to meet your needs. Contact us today to learn more about customizing your automatic fire extinguisher system to fit your unique fire safety requirements.

### Support and Services:

Our FM200 Hanging Fire Extinguisher is designed to provide fast and effective fire suppression in critical areas. It is equipped with advanced detection and control systems that can quickly detect and suppress fires before they can cause significant damage. Our product technical support and services include:

24/7 technical support hotline

On-site inspection and maintenance services

Training and education programs for users and technicians

Customized system design and engineering services

Our team of experts is committed to ensuring that your FM200 Hanging Fire Extinguisher is always operating at peak performance. Contact us today to learn more about our technical support and services.

### Packing and Shipping:

#### Product Packaging:

1 FM200 Hanging Fire Extinguisher

Mounting hardware

User manual

#### Shipping:

Shipping method: Ground

Estimated delivery time: 3-5 business days

Shipping cost: Calculated at checkout. One is price. According to our suggestion, if your protection zone (not separated) is less than 3 zones, our suggestion is cabinet type.

Another one is installation. It is obvious that installation of pipe network type will be more difficult than other types.

About cabinet type and hanging type, they are basically same. There are also two factors which you should take into consideration.

One is that requirement of extinguishing gas. Since the biggest hanging tank is just 30 liter. It means it can be filled with around 30kg at most. So if your requirement is more than 30kg, you should consider about cabinet.

Another factor is that inner space. If your inner space is not enough to place cabinet extinguishing device, you can consider hanging type. Because it can be hanged on the wall or top of room.

## 1. who are we?

We are based in Guangzhou, China, start from 2017, sell to South America (20.00%), Africa (15.00%), Mid East (15.00%), North America (10.00%), Southeast Asia (10.00%), Western Europe (10.00%), Central America (10.00%), Southern Europe (10.00%). There are total about 11-50 people in our office.

### 2. how can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment;

### 3. what can you buy from us?

Fm200(hc-227ea)/Novec1230/IG541/IG100 gas Fire Extinguishing System, automatic alarm system.

### 4. why should you buy from us not from other suppliers?

One Stop Fire Fighting Equipment supply and professional service. We have MSDS ISO certificates. Mainly export to Europe, Middle east, South America, Africa, etc.

### 5. what services can we provide?

Accepted Delivery Terms: FOB, CFR, CIF, EXW, Express Delivery;

Accepted Payment Currency: USD, CNY;

Accepted Payment Type: T/T, L/C, D/P, D/A, Western Union, Cash;

Language Spoken: English, Chinese, Spanish
