

2.5Mpa High Safety Cabinet Fm200 Fire Extinguishing System Manufactuter Over 10-year

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: xinlin
- Certification: UL,FM,CMA,CNAS
- Model Number: GQQ120/2.5-XL
- Minimum Order Quantity: 1
- Price: negotiation
- Packaging Details: Plywood outer box with bubble bag or paper
- Delivery Time: 10-15 working days after payment or receipt of L/C
- Payment Terms: L/C,D/A,D/P,T/T,Western Union,MoneyGram
- Supply Ability: 50000 sets per week

Product Specification

- Volume Of Cylinder: 40L, 70L, 90L, 100L, 120L, 150L, 180L
- Fulling Density: $\leq 1120 \text{ Kg/m}^3$
- Storage Pressure: 2.5Mpa +20
- Company Type: Manufacturer Over 10-Years
- Spraying Time: Computer Room 8s others ≤ 10 s
- Product Type: Fire Suppression System
- Cabinetmaterial: Steel
- Application: Data Centers, Server Rooms, Telecommunication Facilities
- Highlight: **2.5Mpa Fire Extinguishing System, Fm200 Fire Extinguishing System Manufactuter, High Safety Fm200 Fire Extinguishing System**

Product Description

2.5Mpa High Safety Cabinet Fm200 Fire Extinguishing System Manufactuter Over 10-year

Products Description

As a manufacturer with over 10 years of experience, we understand the importance of reliable and effective fire suppression systems. Our FM200 Fire Suppression System is designed to be both automatic and manual start, giving you the flexibility to choose the best option for your specific needs. The automatic start feature ensures that the system will activate quickly in the event of a fire, while the manual start option allows for greater control over the system. The FM200 Fire Suppression System is an environmentally friendly option for fire suppression.

The system works by releasing FM200 gas into the enclosed space, which quickly extinguishes the fire by removing heat and oxygen. Unlike traditional water-based systems, the FM200 gas does not leave any residue or damage to equipment, making it an ideal solution for areas with sensitive electronics or data.

Our company has over 10 years of experience in manufacturing fire suppression systems, and we pride ourselves on providing high-quality solutions that are both reliable and effective. Our FM200 Fire Suppression System is designed to meet the needs of a wide range of industries and applications, making it a versatile and adaptable option for any space where fire suppression is required.

In summary, the Automatic FM200 cabinet Fire Extinguishing System is a powerful and reliable fire suppression system that is ideal for enclosed spaces where traditional water-based systems cannot be used. With both automatic and manual start options, environmentally friendly FM200 gas, and over 12 years of manufacturing experience, this system is a top choice for anyone in need of a safe and effective fire suppression solution.

Product Paramenters

Product Name	FM200 Fire Suppression System
Volume Of Cylinder	40L, 70L, 90L, 100L, 120L, 150L, 180L
Fire Extinguishing Design Concentration	8-10
Operating Pressure	2.5Mpa
Reliability	99.99%
Operating Temperature	0°C To +50°C
Gas Type	FM200
Installation	Indoor & Outdoor
Type	Gaseous Fire Suppression System
Brand Name	Xinlin

Products advantage

Cabinet fm200 fire suppression system has a large number of advantages, and here is going to have a brief explanation:

Swift response. Since there is no long distance transportation of pipes, so fm200 gas can be directly discharged into protection zone. Meanwhile, its spraying time is less than 8 second. So it will save more time relatively when the fire happens.

Convenient installation. Compared with pipe network system, cabinet system would be relatively simple to conduct installation. After installation of control panels and electric components, left work is just to connect it with one cabinet fire extinguishing device or devices. But one room should not be matched with more than 4 pieces of it because of the limitation of the output current of a control panel.

Lower cost. Obviously, the price would be cheaper than pipe network type for the protection zone which just needs one single cylinder, because there is no need to consider about the expense of pipes and pipe fittings, also the cost of manpower for this part.

Components

As you can see the instruction of fm200 system as the picture on the right side. Storage cylinder group, storage cylinder group frame, nitrogen driving device, nitrogen driving device frame, the cylinder valve, liquid flow check valve, air flow check valve, electromagnetic starter, gas conveying pipeline, collecting pipe, choice valve, three links, reducer tee, reduceing elbow, flange, safety valve, pressure transmitter, pipe, nozzle, chemicals, fire detector, fire controller, sound and light alarm, alarm bell, gas light, emergency start / stop button, etc.

Company profile

Guangzhou Xinlin Firefighting Equipment Co., Ltd. is located in Guangzhou, a vital city connecting China to the world, characterized by its convenient transportation and picturesque environment. We are a manufacturing company with a professional and seasoned team of employees, consisting of solution design experts, technical installation specialists, quality inspection professionals, and after-sales service teams, dedicated to the research and development of HFC-227ea (FM200), IG541, IG100, and Novec 1230 products.

Currently, we offer a range of commonly used fire suppression systems, including FM200 fire suppression systems, cabinet-style FM200 fire suppression systems, fully automatic fire extinguisher (hanging), portable fire extinguisher, IG541 fire suppression systems, IG100 fire suppression systems, fire detection tube fire suppression systems, as well as automatic fire extinguishing pipelines.

With high quality products, perfect service and good reputation, the company has won wide praise from customers at home and abroad.

Why choose us

- Efficient management system
- More than 10 years of experience in gas fire fighting industry
- Advanced equipment and professional engineers
- We provide 8×6 hr technical support and after-sales service

Frequently Asked Questions

Q1: Are you a manufacturer or a trading company?

A1: We are a professional manufacturer specializing in gas fire suppression systems.

Q2: Do you offer OEM products?

A2: Yes, we welcome your own designs and drawings.

Q3: Where is your factory located?

A3: Our factory is situated in the East Lake Industrial Park of XinTang Town, Zengcheng District, Guangzhou City, Guangdong Province, China.

Q4: How can I get to your factory?

A4: Due to convenient transportation, you can reach us by taxi or by subway. If taking the subway, please take Line 13 to Shacun Station. Before disembarking, kindly inform us in advance, and we will arrange for a comfortable business van to pick you up from there.
